"Hell to break loose in Austria soon," says a dispatch.

Chickens coming home to roost, again. Austria was quite willing to let hell loose in Europe during the war.

No abolition of the blockade will be considered.

The Huns by their starvation stunt are admitting that the British blockade starved them out—and was effectual.

Ten thousand American soldiers married girls in France.

Another alliance for Old Glory—but not popular with the American girls.

Kaiser William expects to return to the fatherland, soon.

Holland has doubtless given the trouble-maker-notice to get out.

Dr. Solf says the attitude in England is a haughty spirit of victory.

Perhaps Dr. Solf might tell us what the spirit of Germany would

have been had she been victorious.

It would have been worse than brimstone and Solf-phur to the Allies.

"The ex-kaiser has the flu," according to a dispatch.

Thought so, when he flew over to Holland in such a hurry.

"The Yanks won the last of Argonne Heights Ar-gonne at last, and were yanked away from the Huns by the Yanks.

A six-day bike race started last night at Madison Square, New York.

Sounds like old times before the advent of the auto and airplane.

Recently Calgary imported a number of goats.

Looking over the long list of nominations for that city's council, after the election next Monday Calgary will be able to add more to its stock of goats.

Hoadley wins in efforts to use up scrub horses for food purposes

Fix Your Buildings So Your Food Bills Will Be As Low As Possible This Winter

Remember that Cold, Draughty Buildings

makes cold Horses, Cattle and Hogs, and cold animals eat more trying to keep warm.

Buildings should be made wind tight, but should be carefully ventilated.

The cost of doing this can easily be saved in reduced feed bills and the better condition of stock in the spring.

Early work on such repairs is also advisable so that the saving may begin early too.

Get your material HERE—free plans if you want them for new work or extensive alterations.

We are not satisfied unless you are.

in Europe—especially in France and Belgium.

Eating horse flesh puts the Ho! in Hoadley for the Canadian housewife.

"Turkey requests the Allies for a clean-up," says a news heading.

Well, yes, there is sure to be a general clean-up of turkey after the Xmas and New Year's festivities are over.

Allies demand Kaiser Wilhelm from Holland.

Probably the kaiser may get to Paris after all—and stay there for good.

Wonderful Bilious Remedy Actually Prevents Attacks

There are two great causes of biliousness—they are constipation and defective liver action.

When Dr. Hamilton's Pills are taken, they are not only correct constipated bowels, but act upon the liver as well.

Unlike ordinary medicines which purge and give temporary relief, Dr. Hamilton's Pills remove the conditions which cause biliousness, and thus permanent cures are effected. No person who occasionally uses Dr. Hamilton's Pills will ever suffer from the headache, bad stomach or bilious complaint. Get a 25c box today.

(Continued.)

"We have not heard from Lawrence yet and do not understand it. Can you do anything to set our fears at rest?"

"I'm sorry I can't," said Foster, who, seeing he must deal with the matter boldly, asked Featherstone: "Have you any ground for believing I have not been frank?"

"It is an awkward question. You are our guest and my son sent to us. I must say that we had begun to like you for your own sake, but I have grounds for supposing that you kept something back. To begin with, Daly, whom you told us you meant to mislead, was here again yesterday."

"Did you give way to his demands? It's important that I should know." Featherstone hesitated, and Foster saw where his suspicions led, but for the next moment or two he was absorbed by speculations about Daly's visit. Then Alice looked at her father with a smile.

"You can tell Mr. Foster. It's obvious that he was in league with the fellow he would have no need to ask."

"I did not give way," said Featherstone. "He must have seen that I was determined, because after the first I thought he did not press me very hard."

"Ah!" said Foster; "that was curious, but we'll let it go in the meantime. I suppose there is something else?"

"Since you tell the police have paid me another visit. They asked some rather strange questions, and sides inquiring where you were."

"Which you couldn't tell them?" "I didn't know," Alice rejoined pointedly, and Foster saw that Alice had said nothing about his recent visit. She gave him an inquiring glance, as if she wanted to know he did not state his reasons for going to Newcastle, but he looked as unbothered as he could. He did not signal her, because while this might escape his host's notice he was afraid of Mrs. Featherstone's.

"Well," he said, "it might be better if you, so to speak, formulated your suspicions and made a definite charge. After all, I'm entitled to face it."

"I do so most unwillingly, but I feel an explanation is necessary. To begin with we had one short letter from my son, stating that he could not come home but you would tell us how he was getting on. This was all; he said nothing about Daly or his stirring case with you. You arrived with his portmanteau and when I now think it is rather curious story. Then, after Dal wrote, you suggested an extraordinary plan, which, as the fellow said, I doubt if Mr. Foster could deceive him."

"We'll go on," Featherstone resumed, turning to Foster. "There was a very mysterious affair at Gardener's Crossing shortly before you left and some valuable bonds were missing."

"Foster's face got red, but he laughed. "This is too much, sir! If your suspicions went so far, why did you not tell the police?"

"The conclusions are vague but disturbing," Lawrence trusted you and, you tell us, started with you for a place he did not intend to reach. Since then he has vanished. It is possible that you have deceived both him and us."

"That's rather absurd," Alice remarked. "I really don't think Mr. Foster would make a very dangerous plotter, and you admitted that Lawrence trusted him."

"I did," Featherstone rejoined sharply, as if he resented the interruption. "Still I don't see your argument."

"She means that Lawrence is not a simpleton," Mrs. Featherstone interposed. "For my part, I doubt if Mr. Foster could deceive him."

"We'll go on," Featherstone resumed, turning to Foster. "There was a very mysterious affair at Gardener's Crossing shortly before you left and some valuable bonds were missing."

"Foster's face got red, but he laughed. "This is too much, sir! If your suspicions went so far, why did you not tell the police?"

"The conclusions are vague but disturbing," Lawrence trusted you and, you tell us, started with you for a place he did not intend to reach. Since then he has vanished. It is possible that you have deceived both him and us."

"That's rather absurd," Alice remarked. "I really don't think Mr. Foster would make a very dangerous plotter, and you admitted that Lawrence trusted him."

"I did," Featherstone rejoined sharply, as if he resented the interruption. "Still I don't see your argument."

"She means that Lawrence is not a simpleton," Mrs. Featherstone interposed. "For my part, I doubt if Mr. Foster could deceive him."

"Ah!" said Featherstone with some awkwardness, "there you have met me at a disadvantage! While Daly has the power to injure Lawrence, I must keep the police in the dark." He paused and added: "I cannot, say I believed you reckoned on this."

"Thank you," said Foster, but Alice broke in: "Why do you tell my father why you went to Newcastle?"

Featherstone gave her a surprised glance and then turned to Foster. "It looks as if my daughter was better informed than I. There is obviously something I do not know about."

"There is, but I must ask, Miss Featherstone to respect my confidence in the meantime," Foster answered, and getting up, stood silent for a few moments, resting his hand on his chair.

He saw restrained curiosity in Mrs. Featherstone's face and her husband's anger, while he thought Alice knew how significant the line she had looked. She had held him and admitted that he knew her well enough to trust her with his secrets, and declared herself on his side.

In the meantime, he was conscious of a strain that he thought the others felt and was sorry for Featherstone. He had to resent the man's anxiety about his son. For all that, he did not mean to tell him why he had gone to Newcastle. It would not make a plausible tale.

"I must own that thinks look bad for me," he said, "can't offer any explanation of 1370 would satisfy you and could not expect you to take my word that I mean well. All I can do is to frighten off Daly and then finish Lawrence, and I'm going to try."

"It doesn't matter much about Daly now. But if you can find Lawrence, you will clear yourself."

Alice turned to her father with an angry sparkle in her eyes. "That's a very grinding confession for us to make. We will not blame Mr. Foster when he has proved that it's impossible for him to be guilty."

"The tension was too great for any of them to be much surprised at their outbreak and Featherstone said dully, 'It's long since I've heard of you.'"

"Logically" Alice exclaimed in a scornful tone. "Do you expect Mr. Foster to be satisfied with that, after what he has borne and the risks he has run for us? Now, when things look bad for him, is the time for you to show your trust and knowledge of character?"

"You imply that your judgment is better than mine," Featherstone rejoined, but without heat.

"I know an honest man," Alice said quietly, with a color in her cheeks. "You were silent for a few moments and by an effort of self-control Foster kept his face unmoved. He did not mean to let the other see the exultant satisfaction the girl's statement had given him. Featherstone brooded with knitted brows and a troubled look. Then he said: 'You will understand, Mr. Foster, that this has been a painful interview to my wife and me. You were our guest and my son's friend; but I do not know what has happened and we have no news of him. I am sorry to bring him back, I will ask your forgiveness for all that I have said.'"

Interesting Juveniles

In Farm Work

Enlisting the Aid of the Children in Food Production

The boys' and girls' clubs of Western Canada are doing very valuable work at the present time by enlisting the aid of the children in food production. They are also helping to make life on the farm more pleasant by the improvements in social and other conditions that are continually taking place, will go a long way towards keeping these children on the farms when they grow older. In all the prairie provinces there are successful clubs, pig clubs, poultry clubs, potato clubs, and clubs of other kinds, some of which are doing very good work.

At the present time the importance of greater food production is in the foreground, and on this the efforts of the clubs are at present being concentrated. Hence this year pig raising, poultry raising, potato growing and calf feeding have received most attention. The young club members are stimulated in their efforts by means of contests. In Saskatchewan it is estimated that more than two thousand children have entered for competitions that will take place this fall in calf feeding, pig feeding, poultry feeding and potato growing. It is difficult to obtain figures, but it is safe to say that the children of Alberta and Manitoba have been no less active than those of Saskatchewan.

The Kaiser's Joke

Turning Pantomime to Tragedy for His Country and the World

The Kaiser is the gentlest soul who ever (by proxy) "scattered ship or cut a throat." His fine sense of humanity is outraged because the allies have dropped bombs on the "open town" of Frankfurt. The "Al Higest" is a good stock actor, and in his time has played many parts. Late in his variegated career he has displayed great natural gifts as the Demon King, turning pantomime to tragedy for his country and the world.

During the war he has gloried in atrocities that would have made a Borgia shudder. The supreme jest of the Demon King was the bombing of undefended English towns. It is a long time since we suggested that there should be interchange of courtesies in this respect. The Kaiser has no sense of humor. He cannot see the other side of his own joke—London Daily Express.

Steel Made Skyscrapers Possible

It is the steel frame that has made the tall buildings of cities possible, for steel, being infinitely stronger than brick, the walls of one of these 700-foot buildings can be practically the same thickness all the way up.

With brick, on the other hand, the walls of a tall building would have to be thicker and thicker as they went up. This is because the bottom of a very little floor space would be left on the lower stories. It has been calculated that in a 12-story building 100 feet long and 50 feet wide, 4,000 square feet, or a tenth of an acre, more floor space is saved by having steel frame walls than by having brick walls.

Wool Consumed in August

Manufacturers used a million and a half more pounds of wool in August than in July, 1918, the department of agriculture reports. August figures being 63,900,000 pounds, greater equivalent, compared to 62,300,000 in July. Monthly consumption has averaged about 67,000,000 pounds, or more, equivalent, since January 1, 1918.

An Honest man nearly always thinks justly—Rousseau.

A Record Atlantic Voyage

First Steamship Crossed the Ocean Eighty-five Years Ago

While it is nearly one hundred years since the first attempt to cross the Atlantic under steam, Canadians may remember with justifiable pride that in September, 1833, eighty-five years ago, there arrived at Quebec and from Pictou, N.S., after what must have been an anxious voyage, the plucky little ship Royal William, first to cross by steam alone; that she was launched from the foot of St. Mary's current and her two hundred horse power engines were made and installed by Bennett and Henderson, of Montreal.

The American predecessor of the Royal William, the Savannah, did, it is true, make the Atlantic voyage as early as the spring of 1819, but was forced to resort to sails during the greater part of the time.

The Royal William was entirely a Canadian ship, built by Robert Black, at Quebec, for the Quebec and Halifax Steam Navigation Company, and was towed to the foot of St. Mary's current. Here her engines were installed and Lady Aylmer officiated at her christening.

Intended for Canadian coastwise trade, the Royal William had a capacity of 1,370 tons, but because of her engines, her actual capacity was much less, being only some 700 tons. Her keel was 146 feet and her deck 176 feet long; depth of hold, 17 feet 9 inches. She was rigged like a three-masted schooner, carried three square sails on her foremast and large fore and aft sails.

She had fifty berths in the under deck cabin, a parlor, also a dining saloon in a round house on her deck. When ready to put to sea, she had cost her owners \$16,000.

Her first trip was from Quebec to Halifax and was begun in August, 1831, but as she did not prove profitable, it was decided to send her to England where she might be purchased.

On August 5, 1833, Capt. John McDougall left Quebec on the memorable voyage, carrying a cargo of spars and natural curiosities. He was kept several days at Pictou, caulking and repairing boilers. He had five cabin passengers, and several more on the deck. Cabin passage cost \$20. For fully a third of the time taken in crossing the Royal William was crippled, with her starboard engine damaged and with leaky boilers, but she reached Gravesend under steam on September 11.

The first purchaser of the Royal William was Joseph Somes, a Radcliffe ship owner. Some used the vessel in Portugal, and she was sold after sale in September, 1839, to the Spanish government, the Royal William, now the Isabel Segunda.

By 1838 the last of hull was constructed, and a new hull built for the engines.

In 1845, four years before the Savannah made her trial Atlantic trip, there was an established British steamship line between Liverpool and New York. There was a spirited race across the Atlantic which the Sirius won by a narrow margin.

The second Royal William, also a large ship, was the next to cross.

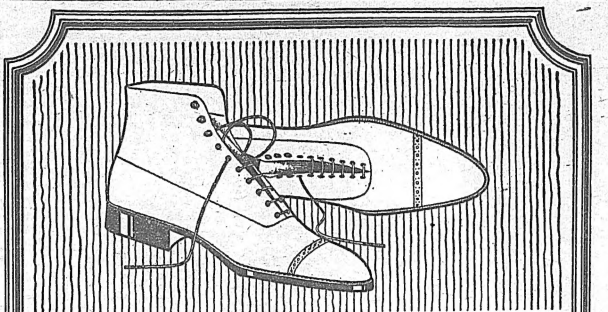

The first real impetus to ocean steamer travel was the royal mail contract which Mr. Samuel Cunard won from the British government.

The service of carrying the mails from Liverpool via Halifax to Boston, which was heavily subsidized, was called for rapid transit and at least four identical steamers. The Cunard service grew amazing.

Montreal was not to have regular steamer service for a long time. After 1815, Captain Alexander Allan, who had, during the Revolutionary campaign, conveyed stores and cattle to Lisbon for Wellington's army, established a regular service of sailing vessels between the Clyde and Canada.

Until 1837, these ships sailed from Greenock to Montreal, but after the Clyde was despoiled of her fleet, the Allan line was transferred to Halifax. From then Captain Allan and his five sons devoted themselves to building up a strong Canadian trade. For nearly forty years they used only sailing vessels and carried the greater part of the immigrants landed on Canadian shores.

In 1852, Sir Hugh Allan's tender to the Canadian government for a weekly mail service was successful, and so began the Canadian mail steamships service. Though they clung for many years to the sailing ships, the Allans may still lay claim to the distinction of having owned and sent across the Atlantic the first steamship.

Good Value and How to Get it

YOUR interest, as a member of the consuming public, and ours as Canada's largest manufacturers of shoes, are really identical. They may be summed up in a single phrase: "Quality Shoes at Fair Prices."

A fair price today is a higher price than usual, because the cost of every item of material and labor which goes into a pair of shoes has increased greatly and is still increasing.

In order that you may continue to get quality at fair prices, we shall feature in advertisements certain specific shoes which we know will give you good value. From our knowledge and experience, we will suggest to you the best methods of buying, whether you select shoes of our manufacture or not.

We ask you to buy for service rather than merely for style; to go to a reliable dealer, and to look for the manufacturer's trade-mark on the shoes. By so doing you may be assured of good value for your money.

Undaunted Italy

Have Cut Down Their Valuable Olive Groves

Sigaro Galli, chief of the Italian coal mission in London, has issued an official statement which explains the coal situation in Italy in a way that every one can understand. In Italy, where the winter in the northern plains behind the fighting line is far more severe than in England, the public have practically no coal at all. Last winter hospitals went without coal. All imported coal goes to the railways and munition works, and they are short of it. It is an uncommon thing for a train to stop between two stations for lack of fuel. Gas is supplied only in eight of the largest towns, and only for two or three hours. Other means of lighting are scarce or ungratifying. Fighting are scarce or ungratifying. Fighting are scarce or ungratifying. Fighting are scarce or ungratifying.

At the beginning of the war, Great Britain was using submarines which weighed between 300 to 500 tons; now she has underwater ships of 4,000 tons, sheathed in armor and carrying 6-inch guns.

Peace Danger

"I don't know about these war inventions when peace comes."

"What about them?"

"These aviator fans may go about in balloons bombing the umpires."

Australia Takes Action

Red Flag Is Offensive to Loyal Australians

Following the decision of the Trades Hall in Sydney and Melbourne to fly the red flag, and the protest made by the acting prime minister, Mr. W. A. Watt, the federal government has taken action to stop the flaunting of an emblem which is considered offensive to loyal Australians.

Mr. Watt announced that the federal cabinet has decided to draft regulations under the war precautions act, setting out the flags that may be flown in Australia during the war in processions or on buildings. Before any other emblem can be displayed, permission will first have to be obtained from the minister of defense. The only flags allowed to be flown without permission will be those of the British Empire, including the Dominions, of the allies, and the flag known as the papal flag.

LIGHTEN YOUR WASHDAY LABOR

Comfort and convenience count on washday, perhaps more than on any other day of the week. Anything that will lighten the work is doubly welcome then.

EDDY'S INDURATED FIBREWARE

Wash Tubs and Washboards

are labor lighteners. They save time and strength. Incidentally they cost no more.

Eddy's Fibre wash-tubs are easy to lift and easy to carry. They keep the water hot as galvanized iron or tin will do. They cannot leak, because they are made of one piece, without joint or seam. And the cost is actually less because they will outlast several of the old-fashioned kinds of wash-tubs.

Eddy's Twin Beaver Washboards save time by the special crimp which loosens the dirt easily. A wash surface on each side gives them double the efficiency of the ordinary washboard.

When you buy matches look for the name "Eddy" on the box. A kind for every purpose.

The E. B. EDDY CO., Limited
HULL, Canada

MURINE Granulated Eyelids.
Sore Eyes, Eyes inflamed by Sun, Dust and Wind quickly relieved by Murine. For Itchy Eyes and in Baby's Eyes Murine is the only remedy. At Your Druggist's, or by Mail, in Tube Box, For Book of the Eye—From Murine Eye Remedy Co., Chicago

Japanese Credits In United States

Merchants and Bankers Have Large Balances in America

Japanese merchants and bankers have large balances to their credit in the United States as a result of Japanese exports of war supplies, etc. But these Japanese creditors have found great difficulty in getting their money from the United States owing to high exchange and other difficulties. The balance, consequently, have for some time been lying here in banks.

The Japanese government has come to the relief of Japanese creditors by offering to take over the balances in the United States and issuing therefor Japanese exchange bonds in Japan.

The amount now offered is 100,000,000 yen, about \$500,000,000, payable for which can be made with bank drafts on the United States.

This puts Japanese creditors in possession of their funds in Japan, in exchange for bonds which the Japanese government becomes possessor of the balances here, which it leaves on deposit with the Yokohama Specie Bank and other banking institutions.

The disposition of Japanese credit balances in the United States has been a matter of considerable interest from early in the war. Before the United States' entrance into the conflict, and when the Japanese and the allies had to find funds to meet large purchases here of raw materials, arrangements were made by which they turned over these United States credits to Great Britain and obtained in exchange British Treasury bonds.

Japan, from time to time, has been drawing gold out of the United States credit balance there, largely because her merchants and bankers needed the metal to ship to India to pay for cotton bought there.

Japan's imports of cotton from India are approximately \$100,000,000 a year. It was recently reported also that Japanese banks were using some of their balance here for the purchase of securities in this market, particularly Anglo-French.

The war has brought considerable wealth to Japan from expanded exports. Her people have had plenty of money to invest, not only in home securities but in foreign obligations. The recent flotation in Japan of a British loan for 100,000,000 yen, or \$500,000,000, was a case in point.

A few days after the lists were opened the syndicate advised that no more subscriptions would be received.

Financial assistance rendered by Japan to Great Britain is only part of what has been done for the empire since the outbreak of the war.

It is calculated that Japanese investments in bonds and treasury notes issued by the empire since the beginning of hostilities, total about \$400,000,000.

Praises Merchant Marine

Subs Have Not Gained Mastery of Seas

The Hon. Mr. Ballantyne describing his trip across the ocean, remarked on an illustration of the power of the British navy that Great Britain's fleet and herself had crossed on a liner with five thousand troops, 100 nurses, and other personnel, including the total to six thousand souls. They had been unscathed, but men had been at the guns day and night, British ships were carrying across the ocean over a quarter of a million American soldiers a month, while Gen. MacArthur's army in the Philippines was two million U. S. troops in France now. No words could too highly praise the sailor who has shouldered the task of transporting millions of troops and men. British vessels still piled to all parts of the world, except enemy ports, and the war and there were ships coming and going at the English ports in large numbers, which showed that the German submarine had not gained mastery of the sea. Business was carried on as efficiently as ever, there was no shortage of food, sugar, butter, jam, cakes, pies, ice cream and luxuries, while the British crews were splendidly rich in food being cultivated.

Mr. Ballantyne then spoke of his visit to France, where he had seen most of the Canadian troops and quoted British, American and French officers as his authority for the statement that the British navy for physique, efficiency and fighting qualities were second to none in France. He had visited the famous 22nd French-Canadian battalion and had talked with Lieut. Lemieux, a gallant officer who had since lost his life. He had visited Canadian hospitals, and speaking generally from what he had seen and heard he believed that the allies now in the Germans permanently on the "hop" and were nearer victory than they had ever been.

Britain Never so Great

Premier Massey, when interviewed in London on the completion of his work at the war cabinet conference, said that one of the most abiding impressions he would take back to New Zealand would be that Great Britain had never before attained such heights of greatness as during the present war. No nation could do what Great Britain is doing—training, equipping and maintaining armies, in munition making, in war finance, in providing the ships necessary to carry on commerce and transport the troops of the allies and their munitions. No nation had ever had such a leading part during four years of war, yet her strength and determination were undiminished.

A Trying Boy

"Dear sir," wrote the anxious mother, "I am afraid Johnny is not trying enough."

"Dear madam," replied the harassed teacher, "I am afraid that Johnny is trying quite enough. He is the most trying boy in the class."

Much Interest Being Taken in Crop

Growing Timothy Seed a Money-Maker for Alberta Farmers

While the growing of timothy seed is as yet a comparatively new venture for many farmers in Alberta, the success of a few pioneers is causing much interest to be taken in this crop by farmers in certain parts of the province. In the Innisfail, Deer and Pincher Creek districts it is becoming known as one of the most profitable and safest crops to grow, and the easiest money-maker. A great many farmers have this year sold timothy seed which has brought them a net profit of \$40 to the acre—and land on which this crop can be grown successfully is being sold at considerably less than half the amount per acre that one crop will bring.

Timothy seed grown in Alberta is well liked by eastern buyers, and many parts of the province are particularly well adapted for the growth of seed of high quality. The demand for it is expected to grow, as there is just as much difference in the size of seed of high quality. The demand for it is expected to grow, as there is just as much difference in the size of seed of high quality.

This year fully seventy-five per cent of the timothy seed grown in Alberta is expected to grade number one and the output will be about 100,000 tons. The demand for it will be an exportable surplus in the province of about two hundred cars next year. In addition to the price of seed of high quality, the growing of timothy is also receiving a considerable amount for his hay.

German Points Way to Peace

Another Effort to Get the Allies to Discuss Steps

A draft of a constitution for a league of nations, worked out in detail by the German Foreign Office, is published in the Vossische Zeitung of Berlin. It is taken from a book entitled "The German Way to Peace," which Erzberger will publish soon.

The first action of this examination, dealing with the organization of such a league, says: "Any sovereign state can enter the league, which shall be considered to have been formed when the following powers are among those who have announced their intention to join: Germany, France, United States and Russia."

The Hague would be the seat of the league and there the international bureau would conduct its business. Each state, with the approval of its parliament, would appoint a delegate. The international bureau would be controlled by a permanent administrative council composed of representatives of the federated powers, with the Dutch foreign minister as chairman.

Erzberger invites criticisms of his plan, as well as practical counter-proposals. He recalls that last year this Centrist leader presented himself as the author of the famous Reichstag speech, in which he demanded reparations and indemnities, which were thrown into the scrap heap at Brest-Litovsk.

The article is looked upon in London as another move in the enemy's peace offensive.

"The Hague would be the seat of the league and there the international bureau would conduct its business. Each state, with the approval of its parliament, would appoint a delegate. The international bureau would be controlled by a permanent administrative council composed of representatives of the federated powers, with the Dutch foreign minister as chairman."

Erzberger invites criticisms of his plan, as well as practical counter-proposals. He recalls that last year this Centrist leader presented himself as the author of the famous Reichstag speech, in which he demanded reparations and indemnities, which were thrown into the scrap heap at Brest-Litovsk.

Care of the Eyes

Avoid Unnecessary Strain in First Rule

The person who wishes to keep young and useful should take excellent care of the eyes. Eye strain, because of overwork, is one of the most common causes of eye trouble.

The first rule in the care of the eyes is to avoid straining it unnecessarily. This means that the eyes should be closed for a few seconds now and then when employed on work requiring great concentration. It means also that the eyes should never be strained by trying to read in a poor light or one that is badly placed. It means also that as soon as an eye trouble is suspected a good oculist should be consulted.

Besides all this, the eyes should be kept constantly clean. In the morning when you get up with the eyes should be washed out with an eyewash and a solution of boracic acid. This is nothing more or less than a small teaspoonful of boracic acid dissolved in a pint of previously boiled water—the boiling being necessary to insure the purity of the water. A bottle of this solution will last several weeks. The mild antiseptic will wash away dust from the eyes or lashes, or will remove any irritation caused by a night's sleep, and will leave the eyes feeling clear and refreshed.

Decide Marriage Is Public Duty

The London Times prints the following: Summonses against a Liverpool firm for using petrol to convey a wedding party to and from church, and a Liverpool stipendiary magistrate and was adjourned pending a decision of the petrol control, as was formally withdrawn recently. The police intimated that the withdrawal was due to instruction by the petrol controller, under the petrol order, who had written that parties, in contracting marriages, were performing a public duty.

Co-ed—I want a shirt.
Teacher—What do you want it for?
Co-ed—I don't want to read it. I want to buy it.

German Efforts To Rouse People

War Critics Admit Seriousness of Situation in Order to Alarm Nation

The frankness with which the German press admits the seriousness of the present situation in the war, as seen by the Canadians, is surprising. It is one of the most desperate attempts to rouse the morale of the nation. "Beating the successes of the allies has been tried for some time in these straits different methods must be utilized to spur on a jaded nation. While a few military writers continue the old line of explanation and reassurance, the majority frankly admit the critical nature of the moment. The Frankfurter Zeitung speaks of the precarious position of Gen. von Buelow's army, owing to the deep drive driven into the German front from the Scarpe. The writer goes on to say that the Germans have to reckon with the fact that a blow from the south side of the Scarpe would shake the whole Aisne salient, and would throw their infantry right against the gates of Douai."

Speaking of the Allied plans, he says the English have started their tactics. The actual attack is made in the form of a surprise attack, and the divisions then go through to continue the attack, the earlier divisions being the most heavily armed. The plan is to cut the German lines, and he tries to show that this doubt the south side of the Scarpe would shake the whole Aisne salient, and would throw their infantry right against the gates of Douai."

A significant and probably inspired article by a well-known German military writer describes the damage done to Douai by British guns, the inference, by experience, being that the German plan is to cut the German lines, and he tries to show that this doubt the south side of the Scarpe would shake the whole Aisne salient, and would throw their infantry right against the gates of Douai."

Fully Explained

The learned counsel in the great case, literally beamed with joy. Here you could give such an accurate and witness should be.

"I congratulate you, sir," he said, enthusiastically. "Your memory for detail does you immense credit, and on behalf of the numerous readers of the testator in the court I should like to thank you for the very flattering though none the less truthful description that you have just given of that esteemed gentleman who is now, I feel, no more."

A murmur of applause went round the crowded court.

"I presume," continued the learned counsel, "that you were very intimate with the testator during his lifetime."

The witness hesitated and blushed a crimson red. "N-o," he stammered. "In fact, I never saw him in my life."

"But, really, sir," cried the barrister, in surprise. "I fail to see how you could give such an accurate and flattering description of him if you never saw him."

The witness gave a very sickly smile. "Perhaps you will understand better," he said, "when I tell you that I married his widow."—Tit-Bits.

Dealers Must Have License

Buying or Contracting for Produce Without License Contrary to Food Regulations

The attention of the Canada food board has been called to the fact that frequently adopted by licensed dealers in apples, turnips, potatoes and other food crops, and vegetables, men living in different parts of the country acting as their agents, buying or contracting with the board, extending the loading of same in cars ready for shipment, and receiving a commission from said dealers for their services.

All such agents operating in the manner mentioned, without first having secured a license from the board, are doing so contrary to the order dated 13th day of December, 1917, wherein it states:

"That on and after the 1st day of February, 1918, no person shall deal wholesale in fresh fruits or fresh vegetables, without first having obtained a license from the food controller, and in violating such order are guilty of offence, and subject to a penalty not to exceed \$1,000 and not less than \$100."

Not To Be Overlooked

It is told of Dr. Oliver Wendell Holmes, says an exchange, that he was one day strolling on the beach, near his summer home, when he began chatting with a little girl who was playing in the sand. The child ran up to him, and he picked her up and walked with him. By and by she said:

"Good-bye, my dear," said Dr. Holmes, "and when mother asks you where you have been, tell her you have been walking with Oliver Wendell Holmes."

"And when your folks ask you where you have been, tell them you were walking with Mrs. Susanna Brown."

Surprises in Store

There are some marvelous surprises in store for German leaders who think that after the war all that they have to do is to appear again in the company of other nations, crying high-heeled: "I have forgiven you, and you have forgiven me, and all the rest of you grant me forgiveness."—New York Tribune.

King Praises Hospital Staff

His Majesty on a Canadian-Built Ballast Train With Canadian Engine

Mr. Fred James, official correspondent of the Canadian forces in the field, writes as follows:

During his recent visit to France his majesty paid a special visit to the Canadian hospital at Doullens which was deliberately bombed by the Hun a few months ago. The king had once before inspected the buildings, just before the Armistice, and had specially admired the big operating theatre at that time, but on this occasion he met the mass of charred ruins. From the lips of the commanding officer the king heard the story of the outrage, and as he was leaving the royal visitor paid a special tribute to the nursing sisters and doctors, saying: "By continuing your work in such a terrible and dangerous experience you have set an example to the whole world."

Another anecdote which the king inspected was a railway construction battalion, which is turning a plaid French landscape into one of the most beautiful in France. Steam shovels were levelling the rolling country, bridges were rising through the little rivers which flowed through the land, and the work of the men was being put down each day. The king watched the scene with interest, and he remained much longer than expected, and had to curtail other engagements for the afternoon. He finally rode away on a Canadian-built ballast train drawn by a Canadian engine.

Fashionably Pointed

Artificial Feet

Practise of Cutting Down of Foot to Fit Boot Unwise

Some returned soldiers with leg amputations, who have been issued artificial legs by the department of soldiers, are unfortunately being induced to cut down the wooden foot so that it will fit into a fashionable shoe. The latter is the chief of the orthopedic and surgical appliances branch of the Canadian department with the call the attention of the veterans to the fact that the practice is unwise. A man who has worn army boots for some time cannot expect to wear civilian shoes of the narrow pointed last now fashionable. This is especially true in the case of a man who has worn army boots during the months that he is waiting for his stump to heal sufficiently for the wearing of an artificial leg, his remaining in civilian shoes during the period of waiting is a great deal of trouble and a great deal of expense.

It is especially true in the case of a man who has worn army boots during the months that he is waiting for his stump to heal sufficiently for the wearing of an artificial leg, his remaining in civilian shoes during the period of waiting is a great deal of trouble and a great deal of expense.

Pool Proof Plane Problem Nearly Solved

Newest British Machines Make Their Way to Earth With Slight Damage

The absolutely fool proof airplane has not yet been invented, but it is the opinion of American pilots who are working in a British airbase, the newest British machines have very nearly solved the problem.

Left to themselves these latest type of heavier-than-air machines would make their way safely to earth, except for slight damages which may follow a landing. The machines are being handled and the wings so arranged that when the engine stops they glide gradually and easily to earth.

The following test shows how stable these airplanes are: A pilot climbed to a sufficient height, and then stopped his engine and took his hands off the controls, merely keeping his feet on the rudder bar. He steered for an altitude twenty miles away, and except for keeping his straight he let the airplane do what it liked. She travelled the whole world, and landed at a bicycle, coasting down a long, straight and gentle hill. Of course the pilot had no hand in the control, and he landed the machine in the airfield, but except for that and the steering the airplane made the whole journey by herself.

Situation Grows Difficult

Thousands are Employed Repairing Zeppelins

Thousands of workers are now engaged in repair work on the Zeppelins, according to a frontier correspondent of the Telegraph. They are working under the direction of German military engineers on the Mole, the locks and the walls of the canal, and the cement-weighed cruisers which were sunk there by the British. The Telegraph reports that all the repairs which have been carried out at Zeppelins harbor, Mole and locks have been destroyed by airmen, and the canal remains closed.

The Germans will by slave-driving methods to re-establish Zeppelins as a practical means of transport. The continuous air offensive of the British army maintains the effect of the British navy's work.

Actually the situation grows continually more difficult for the Germans, as they sit up to guard the sunken ships and makes shoals in whatever remained of the fair-weather. The British navy's work is becoming more firmly imbedded.

Great Britain Not Shirking

One Out of Every Fourth Man Has Enlisted

In some quarters, writes the Literary Digest, the belief still lingers that Britain is not doing its share in the war as a member of the alliance, and to correct that impression the British war mission to America has put out an interesting pamphlet called "Blood and Treasure," which gives us some idea of the enormous efforts of the United Kingdom.

From this pamphlet we learn that in August, 1914, when the war broke out, Great Britain's entire military strength amounted to 700,000 men, composed of 250,000 in the regular army, 200,000 in the militia, and 250,000 partially trained troops belonging to the territorial, a body of volunteer troops roughly corresponding to the American National Guard. Here is the tale of what has been done since then:

"At the outbreak of the war, enlisted in her army and navy one out of every four males, from birth to manhood, in the entire population of the British Isles. The first expeditionary force of 100,000 arrived in France in mid-September, 1914, and in the next few months, 1,300,000 men were sent to the front. By July 31, 1915, 2,000,000 had enlisted."

"At the outbreak of the war, enlisted in her army and navy one out of every four males, from birth to manhood, in the entire population of the British Isles. The first expeditionary force of 100,000 arrived in France in mid-September, 1914, and in the next few months, 1,3

NOTICE

I have a few barrels of Polerine, which, if bought before Feb. 1, 1919, can be had at the old price, 72 1/2¢ per gallon. Buy now and save 17¢ per gallon, or about \$8.00 per barrel.
 C. R. BROWNELL

What a Bureau Really Is.

When parchment was used for writing and when bookbinding was in its infancy and a bound book was a costly luxury it was the custom to place the book on a piece of cloth or a strip of wool in order to prevent the binding from possible damage on the rough wood of the table. Those who had to deal with money also had a strip of cloth on the table or counter so that the coins should not roll. This strip was called "bureau." In course of time the custom changed, and the same word was applied to the writing table covered with green or other colored cloth and at length descended to the modern table with the centre protected by leather. As an office contains one or more of these tables it is not difficult to understand that the name should in one country have been given to the room that contained the bureau.

SYNOPSIS OF CANADIAN NORTH-WEST LAND REGULATIONS

THE sole head of a family, or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. Applicant must appear in person at the Dominion Lands Agency or Sub-Agency for the district. Entry by proxy may be made at any Dominion Land Agency (but not Sub-Agency), on certain conditions.
 Entry—Six months' residence upon and cultivation of the land in each of three years. A homesteader may live within nine miles of his homestead on a farm of at least 80 acres, on certain conditions. A habitable house is required, except where residence is performed in the vicinity.
 In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$3.00 per acre.
 Entry—Six months' residence in each of six years, after earning homestead patent; also 30 acres extra cultivation. Pre-emption patent may be obtained as soon as homestead patent, on certain conditions.
 A settler who has cultivated 30 acres, homestead right may take a purchased homestead in certain districts. Price \$3.00 per acre. Entry—Must reside six months in each of three years, cultivate 30 acres and erect a house worth \$3000.
 The area of cultivation is subject to reduction in case of rough, scrubby or stony land. Live stock may be substituted for cultivation under certain conditions.

STAND OF CANADIANS AGAINST FURY OF GERMANS WAS HISTORIC

STORIES OF GALLANT EPISODES ARE INNUMERABLE

Assaulting Troops Were Supported By The Greatest Massing Of Machine Guns The War Has Produced—Nation Will Thrill With Pride at Story of Gallant Resistance

Saddened by the heavy price of victory, the people of Canada will thrill with pride when they come to read the full story of the wonderful stand their troops made against enemy masses bent on taking from their conquests. Gallant and heroic episodes are innumerable. Battalions, companies and little knots of men stood their ground against waves after waves of assaulting troops, supported by the greatest massing of machine guns this war has produced. It is the penalty of storming troops, such as the Canadian corps, that they sometimes create for themselves, in their impetuous advance, unprotected flanks. The enemy then drive into the enemy line becomes enfiladed, and if power is not at hand to widen it out into a wide front, the troops in the apex must either fight it out against overwhelming odds or fall back. The latter is not the lesson the Canadian corps has learned, and it was this desperate clinging to positions, tactically untenable, that contributed to the heavy casualties. Incidentally it was just such stands that stemmed the enemy waves and frustrated his savage efforts to win back Bourton wood.

Such a situation was brought about when a famous Ontario regiment having reached its position, the Canadian Corps, found that its left flank was exposed and shattering enemy masses were advancing upon it. A retirement would have been perfectly justified, but such would have uncovered our centre and imperilled all the gains on our right, brilliantly made in the early morning. So that battalion, much weakened as it was, stood fast. At the end of the battle, the gallant colonel, formerly of the Canadian Engineers, was the only officer unharmed.

Holding the vital trench on the flank was a party of seventeen of this unit, whose command had been taken over by a staff captain, attached to the intelligence staff of the brigade. He had been sent forward by the brigadier to hold the trench, and the ranks of officers, after having been recalled, waited only three days of leave, to take his place in this battle.

This little party was entirely isolated, but for hours they held on to the trench that was the key to the position. They were still grimly carrying on, taking a great toll of the enemy, when the enemy pushed into them. Few were unharmed, and the captain, an M.C., with bar, died of his wounds.

The intelligence officer of another brigade, engaged in line operations, particularly distinguished himself by brilliant reconnaissance work, pushing out beyond our outposts under a continual fire. He comes from British Columbia. A lieutenant in a Manitoba battalion, D.C.M. and M., and formerly a non-commissioned officer, by his devoted example inspired his men to stand fast under extraordinarily heavy punishment. Though wounded in both legs, he carried on till he fainted from loss of blood and was carried out. The commanding officer of a Nova Scotia battalion, though wounded in the leg, which ended fatally, directed his command until he lost consciousness. His brilliant leadership had proved a great asset in a critical part of the struggle.

Increased Acreage for Next Year
Every effort should be made to help the farmers of Canada to put an increased area under the plow this fall. City men have helped with the harvest, and success seems to be assured. City men must help out in cases where farmers find labor scarce for fall plowing. Men, now in cities, who have worked on farms, and can handle horses, should render themselves available for this important work.

Iron Crosses to the number of 4, 635,000 have been bestowed on German soldiers, officers and men. One of the five of the highest rank (Grand Cross) was given by the kaiser to himself.

These American tank crews were trained in England, and had been trained behind the front for the attack. They rolled along before the infantry and directly in the rear of a creeping barrage, and cleared machine gun positions.

After the manner of the British, the Americans drove their machine right on top of the Germans, crushing down men, guns and nests. Some of the crews came out of the fight with their tractors dripping with blood, showing very completely they had accomplished the task assigned to them.

Famous Bible Taken by Bolsheviks
The Bolsheviks have abolished the old calendar and church holidays in Russia and confiscated church property to the extent of billions of rubles. One Bible taken from a Moscow church was studded with diamonds and other precious stones and worth one million dollars. The Baltimore Sun.

One billion silver dollars, laid in a row, says Gas Logic, each coin just touching the one before it and the one following, would form a line that would reach practically around the entire world.

The Stricken Belgians.

Need of War Sufferers Even Greater Today

The eyes of the world have been withdrawn of late from Belgium by the attraction of the battlefronts. The first line outpouring of sympathy for the martyred little country was accompanied by a flood of offerings, in money, in food, in clothing, in all necessities, however parallel in history. The need of the Belgians is even greater today, but there is distress that the people, engrossed in their own war efforts and problems, may not be fully seized of the appalling catastrophe behind the curtain with which Germany has tried to screen her infamies in the land first trodden by her brutal heel. The Belgians today are economic slaves of the Hun. Before the war Belgium was one of the most highly industrialized portions of Europe. Her factories have been dismantled, the machinery has been shipped to Germany, and the operatives have been given the alternative of unemployment or of entering German workshops to forge the weapons which will be used to subjugate the men fighting to redeem Belgium. Millions who depended upon the manufacturing industry for wages or their incomes have been reduced to want and misery. The years of war have been years of steadily lowering physical vitality. The fearful and inevitable penalty of malnutrition—tuberculosis—is scourging the Belgians. Their mother, the most prey. The healthy child has become the exception. It is a sad outlook, the rising generation, upon which will devolve the task of redeeming the ravages of the Hun, will come to its labors encumbered by years of hunger and suffering. The race at war, except the Serbians, has endured such tortures of body and soul.

If the stream of benevolence which has flowed to Belgium from other countries should dry up or greatly dwindle the Belgians would be doomed. In the cities and towns they are living today near the border line of starvation, the supplies from abroad were stopped. Famine would do for Belgium what the Turks have done for Armenia and crown the work of the devastating Huns.—Toronto Globe.

What They Tell About Paris

Germany Says It Is a Deserted and Terror-stricken City

The Boche papers assert that Paris is panic-stricken; that Clémenceau, embarking like a leaf, is frightened to open a window; that the Germans are worn out with fatigue, and that Poincaré is barricaded at the Lyceum and surrounded by his own troops. The authorities are expelling the citizens by force, and the railway stations are overrunning with refugees. Theatres are closed and food is hard to get and unobtainable. Petrol is scarce, shops empty, and the statue of Strasbourg has been carried away and hidden. Paris is a dismal and deserted city where the last unfortunates (who are to be found there still, not from any consciousness in themselves, but because they are too weak to leave) are getting weaker every hour, and start at the slightest noise, even at the foot of a motorist's horn or the bursting of a paper bag that has been inflated by a child.

The truth of the matter is that Paris is so terror-stricken in spirit that it has no need to take on a Churchill and sullen aspect. The public services are conducted marvelously. Everything goes on in the same old way. Post, telephone and telegraph offices, banks, shops and other vast establishments buzz with their usual activity. The Bois is crowded with carriage folk and pedestrians, and the Tuileries, the Champs Elysees, and Luxembourg are alive with children running about, while their elders are seated under the trees. The little girls in the square hop and leap, playing "doubling and tripling" with their skipping ropes. The plucky women never sellers all along the boulevards continue to inhabit the kiosks, who do duty for a dwelling, and one particular florist joyously continues to pack his stall with rose trees and blue hydrangeas on the spot where the Germans were. Finally, the bread is good and a genuine "inside" that is not too soft and a crust that is not too hard.

Tank Mines Little Obstacle
Americans Drive Machines Right on Top of Men, Guns and Nests

Before the American advance the Germans littered the country with tank mines, apparently anticipating a withdrawal. Scores of British-made tanks, many of them manned by American crews, are co-operating in the American advance. One of these rolled over a mine and was blown up, one casualty resulting. The others got through and did splendid execution.

These American tank crews were trained in England, and had been trained behind the front for the attack. They rolled along before the infantry and directly in the rear of a creeping barrage, and cleared machine gun positions.

After the manner of the British, the Americans drove their machine right on top of the Germans, crushing down men, guns and nests. Some of the crews came out of the fight with their tractors dripping with blood, showing very completely they had accomplished the task assigned to them.

Tackled Seaplane To Their Sorrow

Submarine Fought Back and Was Either Badly Damaged or Destroyed

The first case in which it is known that a submarine fought back when attacked by a seaplane, resulted in the probable destruction of the submarine by an American aviator. Reserve Ensign J. R. Carson, in the U.S. Navy, while on duty, was with a ship of the U.S. Navy, when he saw a submarine on the surface. He fired at it with his machine gun, and the submarine was either badly damaged or destroyed.

Ensign Carson, who was on patrol, remained over the spot fifteen or twenty minutes, but the U-boat was no longer in evidence. After going to the base to get another machine, he returned to the spot, and this time again there were no traces of the submarine.

Tzecho-Slovaks Decorated

Received Medals From King Victor of Italy

A recent occasion on which the King of Italy presented medals won for distinguished service in the field to those soldiers who had shown special heroism in the fighting on the Italian front this summer was given a particularly interesting character by the fact that not only Italian but Tzecho-Slovak soldiers were decorated. Both officers and men belonging to the Tzecho-Slovak forces received silver and bronze medals or crosses of war from the hands of King Victor Emmanuel, who spoke of a few kindly words to each, often asking some question and greeting each man with a cordial handshake. The names of the Tzecho-Slovaks who so distinguished themselves are withheld in the accounts of the ceremony published in the newspapers lest it should be the means of bringing suffering upon their families in Bohemia.

What Were They?

Small Girl (entertaining her mother's caller)—How is your little girl?
Caller—I am sorry to say, my dear, that I haven't any little girl.
Small Girl (after a painful pause in conversation)—How is your little boy?
Caller—My dear, I haven't any little boy, either.
Small Girl—Then what are yours?

The German authorities in Berlin have instructed all German soldiers discharged from the army and living in Switzerland, to return to Germany for work in one of the fighting lines, especially in guarding prisoners. German subjects in Switzerland show little inclination to respond to the call, and it is believed that 75 per cent. of the 10,000 Germans affected will refuse to return to Germany.

The Picture of Health

BEAUTY and health usually go together. There may be classic features, but lacking the clear skin and healthy glow of the complexion, they fail to attract.

Pure, red blood is essential to beauty. For, in addition to the color of the skin, it is the body with vitality and energy.

There is a sparkle to the eye and grace and elasticity of every movement of the body.

Health and beauty abound. Now just because Dr. Chase's Nerve Food actually forms new rich blood, it is conducive of health and beauty. It supplies exactly what is lacking when you become pale, weak, languid, and lose the vivacity of health.

Even beauty of disposition and character are marred when the blood gets thin and watery and the nerves are weak and exhausted.

The Picture of Health

You lose sleep, suffer from headaches, digestion fails, and you get to looking downhearted and discouraged.

But as your system is restored by this food cure you find cheerfulness and confidence returning. The form is rounded out to graceful proportions, the glow of health is shown in the complexion, and you feel the vigor and energy which enables you to accomplish things.

With restored strength you experience the desire to rest and help others, and no beauty of complexion, of form and of character unites to make you happy and contented.

It is only necessary to look for the portrait and signature of A. W. Chase, M.D., the famous Receipt Book author, on the box you buy so as to be guaranteed against imitations. Dr. Chase's Nerve Food, 60 cents a box, all dealers, or Edmanson, Bates & Co., Ltd., Toronto.

Crossed Bridge

In Hail of Lead English Corporal Prevented Destruction by Germans of Way Over Canal

During the forcing of the Scheldt canal by a Calgary corporal discovered the Germans had not blown up a wagon bridge over the canal so he got a handful of men first and finished off the enemy's machine gun post on this side of the bridge. Then, all alone, he dashed across it, though there were probably a dozen machine guns shooting at him from the other bank. He jumped into a line in the ground, where three German pioneers were waiting the order to throw the switch and blow up the bridge with demolition charges. The corporal layonneted two of the men and accepted the surrender of the third, who offered to show him where the charges were. The corporal cut the wires leading to the explosives under the bridge, and the bridge was one of immense value to his comrades afterwards.

Large Cattle Deal Completed

The consummation of a large deal in cattle by a Calgary packing company has just been announced. The sale involved 1,000 head of steers, and was made by ranches at Taber, Alberta, the price paid by the packing company being \$200 a head, pick to be made from 1,500 head. All summer the animals have been grazing on land that, with the development of the country will later be divided into irrigable farms. Producing as much nutritious grass as this land does now, it is not very difficult to imagine its enormous capacity for production when properly cultivated and water is applied intelligently.

Refuse to Return to Germany

The German authorities in Berlin have instructed all German soldiers discharged from the army and living in Switzerland, to return to Germany for work in one of the fighting lines, especially in guarding prisoners. German subjects in Switzerland show little inclination to respond to the call, and it is believed that 75 per cent. of the 10,000 Germans affected will refuse to return to Germany.

The German Whimper

Everybody knows the differences between a manly attitude in the face of misfortune, and a whimpering attitude. And today the commonest tone of the German rulers is a whimper. This is presumptive proof not only that their own nerve is failing, but that they see evidence all round them of a sinking into fear and despair.—From the New York Evening Post.

Ingram's Milkweed Cream

Two Sizes—50c and \$1

For 25 years Canadian women have found Ingram's Milkweed Cream the most efficient toilet preparation on the market for keeping the face clear of all blemishes, removing wrinkles and wrinkles, keeping the skin soft and supple, and warding off the hands from the face. It has therapeutic qualities no other emollient possesses.

Always have a box of Ingram's Velveteen Souverain Face Powder (50c) in the house. A mere touch and all blemishes and perspiration disappear. It covers up blemishes and gives you a clear, flawless complexion. It stays on. At your drugstore there is a complete line of Ingram's toilet products including face powder, eye cream, and tooth powder.

A Picture with Each Purchase

Each time you buy a package of Ingram's Velveteen Face Powder, you will receive a picture of a girl without charge, a large portrait of a famous Canadian woman, or a small portrait of a famous Canadian woman. You will get a different picture for each time you get a different package. Ask your druggist for a collection for your home. Ask your druggist.

Two Kinds of Dollars

"A dollar thrown away is not as bright as a dollar put away," is an old proverb. Though people no longer hoard money in stockings, the principle is as true as it ever was. The dollar that is thrown away doesn't stay wholesome and useful. The dollar that is put away keeps its earning power and utility in time of need.

The future of Canada will depend on the dollars that are put away now. The great prosperity we are enjoying now cannot last forever. You may have dollars to throw away now; but if you do you will, long some day for dollars to put away. Then the dollars the other fellow has put away will look mighty bright to you. Saving the dollars is common sense, and it is patriotism too. Start putting away the bright ones.

Indians Aid Food Production

There will be approximately 100,000 acres of Saskatchewan land in the greater production scheme directed by the commissioner of the department of Indian Affairs next year. This means a decided increase in the acreage cultivated by the Indians who have shown a great willingness to work harder than they ever did before on their holdings, in view of the shortage of foodstuffs. The amount the Indians will seed to wheat next year is double their acreage this year.

AutoStop SAFETY RAZOR

From the War Zone

Comes the news that the AutoStop Safety Razor is helping officers to maintain the high morale of the soldiers.

Nothing makes a soldier feel more like himself than a clean, velvety shave; this is only possible with an AutoStop. Because of its self-stopping feature it is the only razor there is always in perfect condition.

Price \$5.00

At leading stores everywhere.

22c postage will deliver an AutoStop Razor, 25c 25c cash registered mail.

AutoStop SAFETY RAZOR Co.,

Clovers Thrive in Alberta

Every Year Seed in Increasing Quantities Is Being Produced

White, alsike and sweet clovers grow abundantly in the irrigated districts of Southern Alberta and in the central and northern parts of the province without irrigation. The proficacy with which white clover grows in Central Alberta is especially noticeable in the restorative clover of Edmonton, where the clover has overgrown the lawn grass on the borders of the streets, giving them a carpet of white throughout the summer. It spreads spontaneously and is perfectly hardy.

Alsike clover is a very hardy crop and is grown successfully in many parts of Alberta, with and without irrigation, both for hay and pasture. In Central Alberta it is frequently grown with timothy. South of Edmonton a farmer has a field of alsike which was planted eight years ago; the growth of which was thicker this year than with the first crop. This crop has passed the experimental stage and every year seed in increasing quantities is being produced.

Sweet clover is grown in all parts of Alberta at a later date than the other two varieties mentioned, but it is becoming grown quite successfully, and becoming increasingly popular among dairy farmers.

STRONG PEOPLE NEEDED

The need for people to be healthy is urgent. Those who are ill have put outside the ranks of robust men and women feel their position keenly. Every ill man and woman should remember that the ill of debility, nerve exhaustion, indigestion, sleeplessness, neuritis, and depression are the result of a faulty blood supply. Worry, over-work or other causes have impoverished the blood and left the life-stream impure. The nerves thereby are starving and the whole system is languishing for new blood. In this condition many thousands have won back strong nerves and new health and strength through the famous pills of Dr. Williams' Pink Pills actually make. In a weak or debilitated condition it is not only a waste of time and money, but also a further menace to our health. Follow the example of so many thousands who have given up their ailments for a fair trial, and they will transform you into healthy, active men and women. You can get the pills through any dealer in medicine, by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

Has Hardest Task

Individual Feats of Courage in Gouard's Army

General Gouard's army had and still has the hardest task of all the French armies. Innumerable feats of individual courage are being performed. One French soldier with an automatic rifle captured a complete German field gun battery. He crept up on the battery position in the dark, shot all the gunners. A lieutenant, a sergeant and a private with automatic rifles took a trench with 105 men by making the Germans believe they had been outflanked in force.

A traitor to the cause of an adversary was given in the last few days of a mortally wounded German officer who exclaimed to a French officer:

"You have fought magnificently. You will be in my country by Christmas. As a soldier I congratulate you."

Minard's Liniment Cures Diphtheria.

Lens and Armentieres

Wrecked by Four Years of Devastating War

Lens, given up by the Germans, is the centre of the "black country" of France and the key to the coal fields. Before the war the great manufacturing district of Northern France obtained its output of coal from the Lens country, as did also Paris. The output was about 10,000,000 tons. Lens is also a manufacturing centre, but four years in the proximity of a modern war has almost utterly destroyed the city.

Lens has been the scene of bitter fighting. In the fall of 1914, when Sir John French tried to outflank the Germans the enemy succeeded in taking up a line putting Lens behind him. Both in the spring and the fall of 1915 heavy attacks were made by the French and British in this district, but, though local successes were gained, the line was not broken and the city remained in German possession. In April, 1917, the Canadians took the town of Vimy Ridge, to the south of the city, and were pressing in on it and "pinching" it when the corps was called north to the Eastend operations.

The evacuation of Lens by the Germans opens up again to the French the coal fields, though the enemy likely has done all in his power to wreck the machinery for working the mines. It is judged from reports received from the front, Lens has been deluged with gas from time to time, probably for the past six weeks.

Armentieres, also evacuated by the enemy, is a manufacturing city on the River Lys, about 10 miles between Lens and Ypres. Four years of war also have wrecked this city. The British held Armentieres from the fall of 1914 until their retreat in this sector last spring.

The New Freedom

"Your wife starving? What's the matter—can't you get work?"

"Yes, sir; but she can't."

In order to reach the highest point of perfection each of the new square Royal Yeast Cakes will be wrapped and sealed in waxed paper by machinery. This makes them practically airtight, and keeps them fresh longer.

Honor Where Honor is Due

British Scientists Have Risen to and Overcome a Great Emergency

It is sometimes argued as though the application of science to industry were a German discovery. Nothing of the kind. Scientific industries had its origins here. But in the last twenty years prior to the war our rivals both in Germany and America, were certainly making headway at a much more rapid pace, and the three main causes of this were their more convinced belief in the indispensable utility of science, their better organization of industry, and their larger view of the duties of the state towards industrial regulation. British scientists and British manufacturers have risen to and overcome a great emergency, and their success will greatly encourage those who never doubted that when Great Britain once woke up she had the best herself to recover more than she had lost. (London Daily Telegraph.)

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You say to the drug store man "Give me a small bottle of freeze-out," this will cost very little but will positively remove every hard or soft corn or callus from one's feet.

A few drops of this new ether compound applied to the corns will soothe, aching corns relieves the soreness instantly, and soon the entire corn or callus will drop out and can be lifted off with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says "I have tried for a moment, and simply shrivels up the corn or callus without irritating the surrounding skin."

Don't let father die of infection or lockjaw from whitening at his corns, but clip this out and make him try it.

If you druggist hasn't any freeze-out tell him to order a small bottle from his wholesale drug house for you.

His Mother's Keepsake

In the moment of a battle one young lieutenant, running into a hail of fire, showed him under the flap of his pocket a little gold brooch.

"If you're a tired or afflicted woman to me," he said, "try to get hold of this pin, will you, and when you get time ship it to me by mail."

The other promised, and the lieutenant went his way. He had not gone twenty feet when he was struck by a shell and killed instantly. The pin is on its way to the United States.

NURSING THE WOUNDED

It takes strength and courage to nurse the wounded. Every woman should make it her duty to do so. The work is abroad. Health and strength are within the reach of every woman. They are brought to you by Dr. Pierce's Favorite Prescription. Take this medicine, and there's a safe and certain remedy for the chronic weakness, derangement, and disease peculiar to women. It will build up, strengthen, and invigorate every "run-down" or delicate woman. It is the natural function.

At some period in her life, a woman requires a special tonic and nerve. Sold in tablet or liquid form. Send Dr. Pierce, Pres. Invalids' Hotel and Surgical Institute, Buffalo, N. Y., (or branch, Bridgeport, Ont.) 10c for trial package. Write for a free booklet. "I found Favorite Prescription" a splendid tonic for women. Some time ago I became all run-down, weak, nervous and could not get any sleep. Had severe backaches, pains in the head, and was unable to do any work. Took Favorite Prescription and it completely built me up. I am now a healthy, strong and happy woman. I have relieved me of all the annoying pains and aches."—Mrs. J. M. GILBERT, 408 2nd St.

Niagara Falls, Ont. "During middle age, I began to go down in health. I had been very healthy, but I began to appear before my eyes. I also suffered with severe pains in the back of my head and in the neck. When I began taking Favorite Prescription, but by its use I came through this critical period in a good healthy condition. It is a splendid medicine for women at this time of life."—Mrs. W. P. TAYLOR, 187 Bridge St.

A Poor Picture

The teacher had sketched on the blackboard what purported to be a picture of the class. It did not really respond to the request to reveal the identity of the animal the teacher sketched on the blackboard.

"Now, Tommy," she said, "turning to the boy at the bottom of the class, 'come, what does your father call your mother?'"

"Garn," came the reply; "you can't fool me; that's no old cat!"

Canada's Army Corps Second To None

Dominant Factor in Success of Team Play

Major General McBurn, minister of militia, in an address to the army and navy veterans at the Central Canada Exhibition, said that the Canadian army corps in France is the strongest striking force.

"This is admitted by officials of the highest rank and their records have proved it at Arras, Amiens and other points to which they were moved. In the battle of the Somme our casualties have been heavy, but thank God, there were men in the reinforcing pools in France to fill every gap, and the pools were re-filled from the corps in England."

General McBurn said the Canadian corps had developed many virtues and paid high tribute to the work of General Stewart, of the railways. He said, "I would shortly be appointed director of the whole transportation system in France and Flanders."

The dominant factor in the success of our corps is the team play," declared the minister. "In General Currie we have a big man in every sense of the word. He is idolized by every man under him. All are camp-on-claims, but he is determined to see it through to a successful conclusion."

Minard's Liniment Cures Colds, etc.

Sioux Indians

Backing the War

Members of Tribe Enlist and Buy Bonds

The Sioux Indians are among the most enthusiastic war workers of the Northwest, and they are not merely in the movement for a chance to get the "warpath," but are going in to the war with the same understanding of what they are doing as the white men of the Northwest. Many of them attend the schools to enlist with the first companies which were sent out by the state, while others waited for the white men, until they could by draft came, and when this came they did not put in many excuses, but were ready to go when wanted.

The number who have been sent from South Dakota is not obtainable from any central record, but every reservation has furnished its quota, and there are probably more than a thousand from the Sioux in the front, or in the camps getting ready for the trip to Europe. Some of them have been killed in battle. Some of the Dakota Indians have subscribed to \$15,000 for bonds, and hundreds of them are holders of Liberty bonds and war savings stamps in smaller amounts. One of their most popular endeavors is that of "Red Cross work," the women not only doing the same class of work as do the women of the Red Cross societies, but the older ones are put in time on bead work for the many sales which are held at places where the Indians, where decorated robes and bead work, which means days of labor to the older women, are freely donated. Along with these, donations of blankets are common. At a recent sale at an Indian camp on Rosebud Reservation, where there were among the Sioux Indians, the whole affair was under control of Indians, the receipts were more than \$1200 for the Red Cross. At Cheyenne agency, where whites as well as Indians were purchasers, but the donations of the Indians were more than \$1000 for the Red Cross.

Sioux Indians are backing the war movement in every way.

Fresh Supplies in Demand—Where ever Dr. Thomas' Electric Oil has been introduced, supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape in bottles and can be carried without fear of breakage.

Another truly American idea which is saving many lives in the front lines is the so-called "buckshot squads." These squads are made up of crack snip shooters. Instead of directing their efforts on clay pigeons they direct hand grenades which the Germans have toward their trenches. The force of full charge of buckshot on a Mills bomb, for instance, is to make it fall at the feet of the enemy, or to explode, of course, but outside the trench, and the steel particles fly harmlessly over the heads of the enemy. Thus a popular American sport has been directed toward winning the war.—Pittsburgh Sun.

Yankee Ingenuity

Popular American Sport Directed Toward Winning War

Scarcely a day passes but that the news reaches us of some new evidence of the application of Yankee ingenuity to the prosecution of the war. The latest sample is credited to an Indian contingent which successfully tried out setting bear traps in No Man's Land. The Indians were simply applying an idea of their own west where big game is plentiful. The traps are placed outside the American wire, and when Fritz crawls out to gain a little information he gets caught.

Another truly American idea which is saving many lives in the front lines is the so-called "buckshot squads." These squads are made up of crack snip shooters. Instead of directing their efforts on clay pigeons they direct hand grenades which the Germans have toward their trenches. The force of full charge of buckshot on a Mills bomb, for instance, is to make it fall at the feet of the enemy, or to explode, of course, but outside the trench, and the steel particles fly harmlessly over the heads of the enemy. Thus a popular American sport has been directed toward winning the war.—Pittsburgh Sun.

A Poor Picture

The teacher had sketched on the blackboard what purported to be a picture of the class. It did not really respond to the request to reveal the identity of the animal the teacher sketched on the blackboard.

"Now, Tommy," she said, "turning to the boy at the bottom of the class, 'come, what does your father call your mother?'"

"Garn," came the reply; "you can't fool me; that's no old cat!"

WHEN NEURALGIA ATTACKS NERVES

Sloan's Liniment scatters the congestion and relieves pain

A little, applied without rubbing, will soothe the immediately and rest the nerves. Sloan's Liniment is very effective in slaying external pains, strains, bruises, aches, stiff joints, sore muscles, lumbago, neuritis, sciatica, rheumatic twinges.

Keep a big bottle always on hand for family use. Made in Canada. Druggists everywhere.

Less than three weeks to Christmas. Time flies !

Baled Prairie Hay for sale.—B. C. BARKER, Youngstown, Alta.

Some 30 cases of flu were treated at the hospital at hotel and 10 at hospital at the school.

It will certainly be a great relief to know that the Canadian casualty list is finished.

Ernie Key is able to be out again for a short time. The serious burns he recently received are still very painful.

The members of the local Lodge of Oddfellows enjoyed an oyster supper together on Monday evening, after lodge meeting

A Thanksgiving Service will be held in the Chinook church, on Sunday evening next, December 8th, at 7 o'clock. Everyone welcome.

On account of the three notices not being posted up, according to section 38 of the Village Act, the nomination for village councillors has been postponed from Dec. 2 to December 12th.

Stavely is one of the towns that has a "come back" with the flu epidemic. At a time when it was considered about over, the epidemic broke out afresh, and the town is fighting it all over again.

A movement is on foot by the Boards of Trade along this line to try and induce the Dominion and Provincial Governments not to export the wheat from the elevators between Calgary and Oyen, as it will be needed for seed locally in the spring.

A special compilation made by the Financial Post shows that for the forty-seven months of war the fabulous sum of \$1,874,710,900 worth of food-stuffs was exported from Canada. And maybe some of the food-stuffs from Chinook district found its way overseas.

A largely attended meeting of those interested in curling was held in Rennie's office on Friday evening of last week. Officers were elected for the ensuing season, and the rink will be put into good shape as soon as the weather permits. The prospects are good for a very successful and enjoyable season for this now popular winter sport.

The last flu patient was discharged from the Chinook school hospital this Thursday, and Mrs. Mitchell, the last nurse, returned to her home at Cappon on Tuesday. So far Chinook has been fortunate, and now that the flu has apparently left us, every care should be taken to see that there is no "come back" of the epidemic. It is an unwelcome visitor in any community. In many places there has been a "come back," and the epidemic has had to be fought all over again, in some instances with fatal results. Since the above was in type, five new cases are in the hospital from the country.

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

NOTICE is hereby given that M. F. SUTTER of Bearville, Alberta, has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz.:
Between Sections 19 and 20, township 25, range 7, west of 4mer.
Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Fatal Accident Near Chinook

NICK MANAZUK FALLS DOWN A WELL AND IS KILLED

A fatal accident occurred on Thursday evening last, on the farm of Frank Doumaniski, who lives about two miles west of Chinook. It seems that Doumaniski and Nick Manazuk, an Austrian, were digging a well on the former's farm. When they left off for supper on Thursday, the well was then about 40 feet deep. Soon after the meal Manazuk went to work again at well, and Doumaniski to do the chores. On going to the well later, Doumaniski, not finding his man, made a search, and was horrified to find Manazuk had fallen down the well. Help was procured and Manazuk was brought to the surface, but life was extinct, his head being very much battered in. It is supposed that the unfortunate man must have pitched head first into the well in the dark. The remains were interred in the Chinook cemetery on Saturday.

Drop in the Advance office and see our selection of Xmas and New Year's cards. They make a nice and suitable remembrance to your friends, and at a reasonable price.

CARD OF THANKS

Mr. and Mrs. M. L. Chapman wish through this medium to thank their many friends for kindness and sympathy shown during their late sad bereavement.

CARD OF THANKS

Mr. and Mrs. Ernie Key thank the kind friends and neighbors who acted so promptly in saving them and their family and home from the effects of a disastrous fire, and for sympathy and help

MRS. J. ELLIS,
Sec.-Treas., Swan S.D., No. 344
Coltholme, Alta

MONEY TO LOAN

Oslar, Hammond and Nanton, general agents for North of Scotland and other Mortgage Companies have \$30,000,000 invested in farm loans in the West, the returns from which they re-invest in the same way. They have lots of money now. Their inspector, Mr. Stickney, who was in the district a few days ago, says "They have barrels of money, and that no good loan will be refused." Let them renew the loan you have on your homestead, and give you more on your pre-emption, give you money to prove it up if you wish. Or let them give you a new loan, as large, and probably larger, than you can get elsewhere. The district needs all the money we can get hold of in this way. Pay up your indebtedness to the bank, to the municipality, to the school, and to others. We can furnish the money. Loans for five years, repayable in three years, without extra charge. Interest at 8 percent.—nothing but the interest to pay each year.

LORNE PROUDFOOT,
Agent, Chinook
